

C# .NET Developer

POSITION DESCRIPTION

Springthrough is seeking a full-time developer to join our team to develop custom applications for clients using C#/.Net and SQL Server. The successful applicant will participate in the full life-cycle duties to bring these applications to a commercially viable level. This includes the design, development, testing, documentation, installation, and support of the applications.

DUTIES & RESPONSIBILITIES

- Develop and maintain custom applications for our clients.
- Full application development: design, code, test, document, and installation.
- Position may require “after hours support”
- Experience related to designing and improving the User Experience.
- Ability to analyze and formulate a plan, using structured analysis and design.
- Work and communicate with team members to develop new solutions from design and coding through to installation and implementation.
- Confers with supervisor and team members representing area to resolve questions of program intent, data input, output requirements and inclusion of internal checks and controls.

SKILLS

- Experience and passion for software development.
- Solid knowledge of developing C# Windows and Web applications using C# and .Net required.
- Solid knowledge using Microsoft SQL Server and relational database tools, SQL, and stored procedures.
- Complete familiarity with Windows operating systems and other Microsoft applications is critical.
- Thorough understanding of a diverse range of technologies, software, operating systems, and prior technology experience.
- Excellent oral and written communication skills.
- Ability to work independently with little supervision and also in an integrated team environment.
- Optional
 - Software engineering or consulting experience.
 - Server administration, network support, and hardware installation knowledge.

EDUCATION

- Bachelors Degree in computer related field, preferred
- Certifications preferred (Microsoft)
